U.S. Probation Officer Action:

During a home visit on October 29, 2021, Mr. Johnson provided a urine specimen which tested positive for oxycodone. Mr. Johnson advised that his grandmother gave him medication for a headache, but he thought it was Tylenol. When questioned further, he stated that his grandmother did give him a pill out of one of her prescription bottles; however, he stated he did not know it was oxycodone.

Mr. Johnson was verbally reprimanded for taking a prescription medication that was prescribed to another person and we discussed consequences for continued illegal drug use and pro-social alternatives. The U.S. Probation Office drug tested Mr. Johnson on November 12, 2021, and he was negative for all illegal substances. Should he test positive in the future he will be referred to treatment, if deemed necessary. We are respectfully requesting no action be taken against Mr. Johnson as we continue to monitor his abstinence and the remaining conditions of supervision.
